

MUHAMMAD HUSAIN

ABOUTALEBI

Software Engineer

About Me

Full-Stack Software Engineer delivering end-to-end solutions. I bridge intuitive front-end design with robust backend and AI architectures to build scalable enterprise applications.

Languages

English: Fluent | German: Conversational | Persian: Native

Technical Experience & Selected Projects

2025

Enterprise Microservices Platform | Full-Stack Developer

Tech Stack: Go, gRPC, Protocol Buffers, PostgreSQL, RabbitMQ, Docker Compose, Clean Architecture

Architected a scalable, event-driven microservices Platform using Hexagonal Architecture and contract-first APIs for distributed enterprise applications.

2025

Shopora – E-Commerce RAG Agent | AI / Full-Stack Developer

Tech Stack: React, Next.js, TypeScript, Tailwind CSS, Jest, React Testing Library, Python, FastAPI, LangChain, FAISS, Hugging Face Embeddings (BGE-m3), LM Studio (local LLM), SSE Streaming, REST APIs

Built a production-grade RAG-powered AI assistant for e-commerce: Python/FastAPI backend with FAISS vector search and LM Studio inference, paired with a multilingual Next.js chat UI streaming answers grounded in each shop's products, policies, and reviews.

2025

Sentix – AI Predictive Maintenance | AI / Full-Stack Developer

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, NestJS, Prisma, PostgreSQL, Redis Streams, Python, FastAPI, LangChain, FAISS, RAG, HuggingFace, Docker

Architected an end-to-end industrial IoT and AI platform featuring real-time sensor telemetry streaming, automated anomaly detection, and a localized RAG-powered AI repair assistant that retrieves step-by-step diagnostic instructions directly from engineering maintenance manuals.

2025

SaaS Management Platform | Full-Stack Developer

Tech Stack: Python, Django, DRF, PostgreSQL, Redis, Celery, Docker, Nginx, Tailwind CSS, Django Unfold, Scalar, Prometheus, Celery Exporter, Grafana

Engineered a multi-modular SaaS platform unifying LMS, e-commerce, and monetization, featuring Celery/Redis async pipelines, real-time WebSockets, Docker containerization, and Prometheus/Grafana observability.

2025

Enterprise-Scale Mobile Application | Full-Stack Developer

Tech Stack: React Native, Expo, Tailwind CSS, Jest, Python, Django, Django REST Framework, Tailwind CSS, Scalar

Built a sophisticated cross-platform application with a modular architecture, enabling seamless expansion into services such as social networking, education, and e-commerce.

2022 - 2025

MaxC Geomechanics Pre-Processor | Full Stack Developer

Tech Stack: C#, ASP.NET Core, MATLAB, App Designer

Developed and maintained full-stack geomechanics and reservoir engineering software, translating complex engineering requirements into a functional, scalable application.

Education

2019 - 2024

Degree: Bachelor's Degree

University: Amirkabir University of Technology (AUT)

Location: Tehran, Iran

Major: Mechanical Engineering (Mechatronics)
