

MUHAMMAD HUSAIN ABOUTALEBI

Software Engineer

About Me

Full-Stack Software Engineer delivering end-to-end solutions. I bridge intuitive frontend design with robust backend and AI architectures to build scalable enterprise applications.

Technical Experience & Selected Projects

2025 — Production — omniahub.ir

SaaS Management Platform | Full-Stack Developer

Tech Stack: **Python, Django, DRF, PostgreSQL, Redis, Celery, Docker, Nginx, Tailwind CSS, Django Unfold, Scalar, Prometheus, Celery Exporter, Grafana, FastAPI, CI/CD, Traefik**

Engineered a modular SaaS platform unifying LMS, e-commerce, and monetization, featuring Celery/Redis async pipelines, Docker containerization, CI/CD workflows, and FastAPI-based microservices.

2025 — Production — omniahub.ir

Enterprise-Scale Mobile Application | Full-Stack Developer

Tech Stack: **Kotlin, Android SDK, Jetpack Compose, Material 3, AndroidX, Kotlin Coroutines, REST APIs, JSON, Android SpeechRecognizer and MediaRecorder, Gradle Kotlin DSL, JUnit, Espresso, GitHub Actions**

Developed and shipped a production Android app using Kotlin and Jetpack Compose, integrating OTP authentication, REST APIs, AI-powered tutoring, voice features, and automated CI/CD with GitHub Actions.

2025 — Production — omniahub.ir

Production Frontend | Full-Stack Developer

Tech Stack: **React 19, Next.js 16, TypeScript, Tailwind CSS, Nx, next-intl, SWR, React Hook Form, Zod, Jest, React Testing Library, Playwright, Docker**

Built and deployed Omnia's multilingual production frontend with Next.js, React, and TypeScript, delivering responsive landing, pricing, OTP authentication, and profile experiences with backend API integration and RTL support.

2025 — Production — omniahub.ir

Enterprise Microservices Platform | Full-Stack Developer

Tech Stack: **Go, gRPC, Protocol Buffers, PostgreSQL, RabbitMQ, Docker Compose, Clean Architecture, Traefik**

Architected a scalable, event-driven microservices Platform using Hexagonal Architecture and contract-first APIs for distributed enterprise applications.

2025 — Production Ready

Sentix – AI Predictive Maintenance | AI / Full-Stack Developer

Tech Stack: **Next.js, React, TypeScript, NestJS, PostgreSQL, Redis, Python, FastAPI, LangChain, FAISS, RAG, Docker**

Architected an end-to-end Industrial IoT and AI platform integrating real-time telemetry, automated anomaly detection, and a RAG-powered maintenance assistant for intelligent diagnostics.

2025 — Production Ready

Shopora — E-Commerce RAG Agent | AI / Full-Stack Developer

Tech Stack: **React, Next.js, TypeScript, Tailwind CSS, Python, FastAPI, LangChain, FAISS, BGE-m3, Local LLMs, REST APIs, SSE**

Developed a production-grade, multilingual RAG-based e-commerce assistant using Python, FastAPI, FAISS, and Next.js, delivering context-aware, streaming responses.

2022 - 2025 — Production — bpms.maxc.software

MaxC Geomechanics Pre-Processor | Full Stack Developer

Tech Stack: **C#, ASP.NET Core, MATLAB, App Designer**

Developed and maintained full-stack geomechanics and reservoir engineering software, translating complex engineering requirements into a functional, scalable application.

Education

2019 - 2024

Degree: **Bachelor's Degree**

University: **Amirkabir University of Technology (AUT)**

Location: **Tehran, Iran**

Major: **Mechanical Engineering (Mechatronics)**
